

(a) Chunking strategy: paragraph vs fixed-size
[OpenAI-S dense; w=0 plné, w=1 prázdne značky]

(b) Embedding model -- matched 380t chunking
[rovnaké chunky, dense retrieval, w=0]

(c) Retrieval methods
[PARA + OpenAI-S; prekryv pokrytia 42-66 %]

(d) Flat vs hierarchical (zoomed Pareto)
[obe používajú PARA chunky]
